Overview of time tracking alerts

This article is for:

ADMINISTRATORS

EMPLOYEES

TIME & ATTENDANCE

Overview

Staying in the know about your employees' time approval deadlines is key to running payroll on time. Rippling time tracking helps you with this by sending out automated notifications to administrators and time approvers. This article provides details about the following default, uneditable, time tracking alerts Rippling provides:

- A comment is added to a timecard
- Designated approver reminder notifications
- Admin escalation notification
- Payroll admin new approved hours notifications
- Payroll admin excess hours creation
- Timecard notification

Note: With Rippling's notification preferences, users have the ability to customize how and when they receive notifications. Learn more in this article about [managing notification preferences](#).

A comment is added to a timecard

Timing: Whenever the event occurs

Triggers:

- If an employee adds a comment, we notify their approver.
- If an approver adds a comment, we notify the employee.
- If someone else (such as an admin who isn't the direct approver) adds a comment, we notify both the direct approver and the employee.

Designated approver reminder notifications

Timing: Around 3pm PST*

***Note:** Sometimes an approval deadline may be *after* the end date of the relevant time entry's pay period. In that case, these notifications will start going out for unapproved entries as soon as the relevant pay period is complete, not just 48 hours before the approval deadline.

Triggers:

- 48 hours before the approval deadline configured in a time policy, we will notify designated approvers of any unapproved time entries that need approval in order to be included on the relevant pay run.
 - We will notify the designated approver once a day until the entry is approved.

Another thing to note is that when the designated approver is out of office/on PTO, the designated approver's manager can be assigned as the approver while they are out of office. This can be configured by:

1. Navigating to the **Time > Time Settings > Time Tracking > Edit** the time policy in question.

Note: This article provides instructions for the new Time Settings experience, which is currently available to a limited set of customers. If your experience doesn't match what's described, your account may not have been upgraded yet — navigate to **Time > Policies** instead and locate the relevant policy category. Learn more in this article, which provides an [overview of the new Time Settings experience](#).

2. From here, you can select one of two specifications under the option **If an employee's designated approver is out of office, who should we ask to approve their hours instead?**
3. Select either the approver's manager or a Rippling Time full admin.

If an employee's designated approver is out of office, who should we ask to approve their hours instead?

Backup approvers will receive a copy of any T&A notifications intended for the original approver while the original approver is out of office.

The approver's manager

A Rippling Time full admin

4. As long as the manager records their time off request via Rippling, the notification for the timecard will be sent to the person specified around 3pm PST, or 48 hours before the approval deadline configured in a time policy.

Admin escalation notification

Timing: On the day of the payroll approval deadline, around 6 am PST

In this article

Triggers:

Overview

- On the day of the payroll approval deadline, if there are still unapproved hours for a particular run, payroll admins receive an escalation notification letting them know that hours are not approved for a given run.

Designated approver reminder notifications

Payroll admin new approved hours notification

Timing: Whenever the event occurs

Triggers: Payroll admin excess hours creation

- If a payroll run has already been approved by the payroll admin, but then new hours for that run are approved *afterwards* and the run has not yet been processed:

See also

- We will notify the payroll admin of this, and encourage them to [unsubmit](#) and re-approve the run so that those new hours are part of it when processed.

New hours have been approved for Aug 11th - Aug 25th after you had approved the Aug 11th - Aug 25th payroll run.

In order to include these hours in the Aug 11th - Aug 25th payroll run, you must first unapprove the run and reapprove it. If the payroll run is not reapproved before the deadline, these hours will be rolled over to a new off-cycle run including only these additional hours.

Thanks,
The Rippling Team

Payroll admin excess hours creation

Timing: Whenever the event occurs

Triggers:

- When hours are added to a pay period for which the relevant payroll run has already processed, we will create an excess hours run for those entries. We'll then notify the payroll admin about the excess hours run that was created.

Timecard notification

“Shifts from previous pay periods may affect overtime” timecard alert

Timing: This type of alert will populate on a time entry if your company's workweek and pay periods do not line up

**Shifts from previous pay periods may affect overtime**

Please note that the following shifts from previous pay periods may affect overtime for this pay period, as they overlap with the 02/06 - 02/12 workweek for this employee.

Feb. 07, 2022 at 8:30 AM - 5:02 PM

Feb. 08, 2022 at 8:30 AM - 5:01 PM

The notice is stating that shifts from a previous pay period could affect overtime within the current pay period.

For example, say your company's workweek begins on Sundays at 12am, but a new pay period begins on Wednesday.

Shifts worked from Sunday-Saturday would count towards any overtime worked during the week (per the overtime policy rules), but regular/overtime hours worked on Wednesday would be included in the **new pay period**.

This alert does not affect how regular hours and overtime are calculated (as this will always be calculated based on your company's [overtime policy](#)) but is merely an informational notice stating that since the workweek and pay period do not line up, overtime may be included in a different pay period.

Tip: In addition to these default alerts, you can also create custom alerts. Learn more in this article about [setting up custom time tracking alerts](#).
